PATIENT INFORMATION SHEET

Ethylenediamine Tetraaceticacid Disodium Dihydrate (EDTA) (E-006)

Your patch testing results indicate that you have a contact allergy to Ethylenediamine Tetraaceticacid Disodium Dihydrate (EDTA). It is important that you familiarize yourself with this chemical and take steps to avoid coming in contact with it.

What is Ethylenediamine Tetraaceticacid Disodium Dihydrate (EDTA) and where is it found?

This chemical is used as an agent for metals, as a preservative in cosmetic products and as an anticoagulant. Further research may identify additional product or industrial usages of this chemical.

What else is Ethylenediamine Tetraaceticacid Disodium Dihydrate (EDTA) called?

This chemical can be identified by different names, including:

- Cheladrate dihydrate
- Chelaplex III
- Disodium edathamil dihydrate
- Disodium ethylenediaminetetraacetate dihydrate
- EDTA 2Na dihydrate
- Edetate disodium dihydrate
- Ethylenebis(aminodiacetic acid) disodium salt dihydrate
- Edetic acid disodium salt dihydrate
- Edathamil disodium dihydrate
- EDTA disodium dehydrate
- Edetate disodium dihydrate
- Endrate disodium dihydrate
- Sodium versenate dihydrate
- Sequestrene NA 2 dihydrate
- Tetracemate disodium dihydrate
- Titriplex III
- Versene disodium salt dihydrate

This may not be a complete list as manufacturers introduce and delete chemicals from their product lines.

THINGS YOU CAN DO TO HELP MANAGE YOUR CONTACT ALLERGY

☑ Be vigilant … read the product label. Always take the time to read the ingredient listing on product packages. This should be your first step each time you purchase a product as manufacturers sometimes change product ingredients. If you have any concerns ask your pharmacist or your doctor.

☑ Test the product first. If you have purchased a new product you should test it on a small skin area to see if you get a reaction before using the product on larger skin areas.

☑ Advise people you obtain services from of your contact allergy. This should include people like your pharmacist, doctor, hairdresser, florist, veterinarian, etc.

☑ Inform your employer if the source of your contact allergy is work related. You should identify the specific source of the chemical and take the necessary steps to avoid further exposure. Protective wear may be adequate or you may need to make a change in your work activities. Both you and your employer benefit when the cause of your occupational dermatitis is eliminated.

☑ “Google” it. The internet is an excellent source of ingredient information that can be searched by product, by company and by specific chemical. Some helpful independent internet links include:

  - [www.cosmeticsinfo.org](http://www.cosmeticsinfo.org) (Cosmetic Industry Category Ingredient Database)
  - [www.whatsinsidescjohnson.com](http://www.whatsinsidescjohnson.com) (information on all S.C. Johnson product ingredients)

If you have any future contact dermatitis concerns or questions, please call the doctor’s office.
