

**Ethyleneglycol Dimethacrylate**

(E-007)

Your patch testing results indicate that you have a contact allergy to **Ethyleneglycol Dimethacrylate**. It is important that you familiarize yourself with this chemical and take steps to avoid coming in contact with it.

**What is Ethyleneglycol Dimethacrylate and where is it found?**

This chemical is used in the plastics industry to manufacture polyester fibers and resins such as plastic bottles for soft drinks. It can be found in dental composites, sealants, prostheses, adhesives, artificial nails and printing inks. It is also widely used in mixtures of automobile antifreeze and engine-cooling liquids. Further research may identify additional product or industrial usages of this chemical.

**What else is Ethyleneglycol Dimethacrylate called?**

This chemical can be identified by different names, including:

*1,2-Ethanediol dimethacrylate**1,2-Bis(Methacryloyloxy)ethane**2-Propenoic acid, 2-methyl-, 1,2-ethanediyl ester**Ethylene Glycol Dimethacrylate**Ethylene Methacrylate**EGDMA**Glycol Dimethacrylate**Methacrylic acid, ethylene ester*

This may not be a complete list as manufacturers introduce and delete chemicals from their product lines.

**THINGS YOU CAN DO TO HELP MANAGE YOUR CONTACT ALLERGY**

- ☒ **Be vigilant ... read the product label.** Always take the time to read the ingredient listing on product packages. This should be your first step *each* time you purchase a product as manufacturers sometimes change product ingredients. If you have any concerns ask your pharmacist or your doctor.
- ☒ **Test the product first.** If you have purchased a new product you should test it on a small skin area to see if you get a reaction before using the product on larger skin areas.
- ☒ **Advise people you obtain services from of your contact allergy.** This should include people like your pharmacist, doctor, hairdresser, florist, veterinarian, etc.
- ☒ **Inform your employer if the source of your contact allergy is work related.** You should identify the specific source of the chemical and take the necessary steps to avoid further exposure. Protective wear may be adequate or you may need to make a change in your work activities. Both you and your employer benefit when the cause of your occupational dermatitis is eliminated.
- ☒ **“Google” it.** The internet is an excellent source of ingredient information that can be searched by product, by company and by specific chemical. Some helpful independent internet links include:
