CHEMOTECHNIQUE® DIAGNOSTICS

First in Patch Testing... Since 1981

DORMER LABORATORIES INC. www.dormer.com

PATIENT INFORMATION SHEET

Erythromycin Base

(E-024)

Your patch testing results indicate that you have a contact allergy to **Erythromycin Base**. It is important that you familiarize yourself with this chemical and take steps to avoid coming in contact with it.

What is Erythromycin Base and where is it found?

This chemical is an antibiotic often used for people that have an allergy to penicillin and respiratory tract infections. It is also used to treat atypical organisms, including mycoplasma, Legionellosis, outbreaks of chlamydia, syphilis, acne, and gonorrhea and used to prevent "strep". It comes in the form of pills and injections. Further research may identify additional product or industrial usages of this chemical.

What else is Erythromycin Base called?

This chemical can be identified by different names, including:

Abomacetin	EMU	Erycen	ERY-PED	Erythromid	Lalpha-Egg-	Stiemycin
Ak-Mycin	E-mycin	Erycette	ERY-TAB	Erythromycin	phosphatidylcholine	Torlamicina
Aknin	Ergel	Erycin	Erythro	Gallimycin	P.C.E.	Torlamicna
Drmysin	Eritrocina	Erycinum	Erythrocin	Llocap	Pediamycin	T-Stat
E-Base	Erthrogran	Ery Derm	Erythroguent	Llosone	Retcin	USP
E.E.S	Eryacne	Erymax	Erythromast	Llotycin	Robimycin	Wintrocin
Emgel	ERYC	Erypar	Erythromast 36	Inderm	Statcin	Wyamycin-s

This may not be a complete list as manufacturers introduce and delete chemicals from their product lines.

THINGS YOU CAN DO TO HELP MANAGE YOUR CONTACT ALLERGY

- Be vigilant ... read the product label. Always take the time to read the ingredient listing on product packages. This should be your first step *each* time you purchase a product as manufacturers sometimes change product ingredients. If you have any concerns ask your pharmacist or your doctor.
- Test the product first. If you have purchased a new product you should test it on a small skin area to see if you get a reaction before using the product on larger skin areas.
- Advise people you obtain services from of your contact allergy. This should include people like your pharmacist, doctor, hairdresser, florist, veterinarian, etc.
- ☑ Inform your employer if the source of your contact allergy is work related. You should identify the specific source of the chemical and take the necessary steps to avoid further exposure. Protective wear may be adequate or you may need to make a change in your work activities. Both you and your employer benefit when the cause of your occupational dermatitis is eliminated.
- "Google" it. The internet is an excellent source of ingredient information that can be searched by product, by company and by specific chemical. Some helpful independent internet links include:

www.nlm.nih.gov/pubs/factsheets/factsheets.html (U.S. Dept. of Health and Human Services; alphabetic list) www.nlm.nih.gov/pubs/factsheets/factsubj.html (U.S. Dept. of Health and Human Services; subject list) www.cosmeticsinfo.org (Cosmetic Industry Category Ingredient Database)

www.whatsinsidescjohnson.com (information on all S.C. Johnson product ingredients)

If you have any future contact dermatitis concerns or questions, please call the doctor's office.
